ROLLED COLLECTION

ROLLED COLLECTION

Rolled was originally designed to fill a gap in the hospitality industry. The requirement was for a multifunctional, multiple toilet roll holder that was robust, attractive and could be colour coordinated to suit varying interiors.

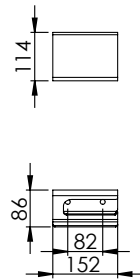

Each item in the collection is made from a single piece of laser cut stainless steel, folded then powder coated. The simplicity and colour flexibility of the Rolled collection makes them as much at home in a residential setting as a commercial one.

Black and white versions are available, as well as a full range of custom colours which are available for quote from pleasepleaseplease.com.au/enquire.

ROLLED ONCE

Rolled Once toilet roll holders are designed to hold one toilet roll as well as other objects such as an iPhone or purse.

Please Please Please is a Melbourne-based industrial design studio specialising in the design and manufacture of bespoke lighting, furniture and architectural elements. Established in 2011, a broad portfolio of bespoke commissions, predominantly for the Hospitality Industry, has been developed. The ever changing, creative nature of this industry to produce imaginative, appropriate pieces has allowed Please Please Please to naturally evolve into creating crafted object collections for the retail market.

Consistently underscored by a belief in the functional and enduring quality of each piece, Please Please Please design and manufacture products that thoughtfully engage with the space they are intended for. Working with a locally based foundry, team of fabricators, timber-workers, and artisans has developed a close, cooperative spirit to produce characterful, quality driven and desirable objects.
